

End Suction Centrifugal Pump

End Suction Centrifugal Pump DIN24255 Series

Back Pull-Out Design (Option)

This design allows the rotating element of the pump to be removed for servicing without disconnecting the pipework. The motor does not have to be moved if a spacer coupling is fitted, eliminating realignment problems during re-assembly

Casing	Cast Iron/Ductile Iron
Impeller	Bronze/Cast Iron/stainless steel
Wear Ring	Cast Iron/Bronze
Shaft	Stainless Steel/High Tensile steel
Shaft Nut	Bronze/Steel/Stainless Steel
Shaft Sleeve	Stainless Steel
Lantern Ring	Cast Iron/Bronze
Mechanical seal	Carbon/Silicon Carbide/NBR
